

ELECTRONICS RECYCLING

Recycling your electronics doesn't have to be complicated. The City of Manassas offers 3 ways to help residents safely dispose of electronic devices (computers, printers, scanners, ZIP drives, keyboards, phones, cameras, TV's, microwaves, audio/video equipment and gaming systems).

Electronic vs Electric

What's the difference?

Electronic items are devices that have transistors/chips that are used to manipulate the electric current running through a device such as cell phones, tv's, laptops, computers, cameras, scanners, ZIP drives, keyboards, printers, video game systems, etc. These types of items contain hazardous waste and should be taken to one of the City of Manassas scheduled drop-off events.

Electric items consist of items that use electricity as energy to hear, light, or provide some type of motion such as a toaster, vacuum cleaner, lamp, fan, etc. These types of items DO NOT contain hazardous waste and can be put out with the regular trash.

Take advantage of our scheduled drop-off events at the Manassas Transfer Station.

Schedule your TV and computer monitors (only) for curbside collection by calling 703-257-8252. These pickups must be scheduled in advance.

You can drop off your electronics at the Securis site in Chantilly on the 2nd Saturday of every month. Please be aware that there will be a charge for this service.
